

How to Create Your Perfect Retail Layout

Step 1: Count how many shelves you have for retail products + measure your shelf widths (you can fit on average c.12 products per metre). Then login to LPS.

Step 2: Log into LPS + click the “Toolkit” toolbar on the homepage. Go to “Retail Merchandising toolkit”.

Step 3: Click the brand logo for the range you want to update + find the layout that most closely matches your retail space.

HOW TO MERCHANDISE YOUR SHELVES FOR SUCCESS!

Take note of our recommendation for how to merchandise your shelves & add the perfect range to your basket in one simple click!

It's now easier than ever to cater to every one of your client's need by **building your own bespoke basket**, adding the products you need and removing those you don't!
